Lesson 4: Do you have change for a five dollar bill?

Read the following passage about a family budget.

Raising a family on a small income isn't easy. You have to find out a way in which you can control your money. Creating a balanced budget allows you to live well and have money left at the end of the month.

For years my family and I barely scraped by. No matter how much money my husband and I made, at the end of the month it was gone, or worse, we had accumulated even more consumer debt. When our income grew, our expenses somehow grew as well. It seemed that no matter what we did, we were always left with nothing by the time the 30th rolled around.

That was until I sat down and made our family budget. You have no idea how much money we wasted over the years - and you are probably doing the same right now. By creating a family budget, you will be able to identify where you are spending more than you should and how to take control of your family finances.

Answer the following questions according to the previous passage.

1. Is it difficult to raise a family with a small income?

2. What does creating a balanced budget allow you to do?

4. What happened to the expenses when the income grew?
